Belected Poetry.

BY JAMES BARRON HOPE See the crimson clouds of evening, Lattice-bars across the blue-Where the moon in pallid beauty, Like an angel gazes through,

Over all the winding river, By the fading sunset kist Slowly rises up the vapor, In a cloud of ghostly mist.

While the Eve is slowly turning Its last grains of golden sand, What a holy quiet hovers Over all the drowsy land! There is now the spell of silence—

Over all the placid water And the vessels slowly gliding llown the river to the bay;

Show on sheets of spreading canvass

Tints which change from red to gray, All is quiet save the murmur, On the tide up in the bar; See each little breaker playing With the image of a star?

And tis thus that human creatures

Give back brokenly the image

Bowed with age or fresh in youth,

Of each grand, celestial truth, Now the brooding silence deepens, And the scene is one of resi While the wrecked day drifts down grandly To be stranded in the West-

The Company has now on hand sufficient iron, ties, &c., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done Sen tember 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Paritic BRINKERHOFF, corner of the Diamond and York street, has just returned from the city th an unusually attractive assortment of now being rapidly built eastward from Sacra mento, Cal., during 1870.

MEANS OF THE COMPANY. Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Gov ernment is uses its Six percent. Thirty-year Bonds to the Company as the road is finished at the average rate of about \$28,250 per mile, amounting

to \$11,208,000. The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which by special Act of Conterinis;

one hundred million dollars, of which five mil-lions have already been paid in, and of which is is not supposed that more than twenty-five mil-lions at most will be required. The cost of the road is estimated by competent engineers to be about one hundred million dol

lars, exclusive of equipment. THE FIRST SEMI-ANNUAL SALE FOR 1807 PROSPECTS FOR BUSINESS. The railroad connection between Omaha and the Fast is now complete, and the carnings on the Union Pacific on the sections already finished for the first two weeks in May were \$113,000. These sectional earnings as the road progresses will such more than pay the interest on the Compa ny's bonds, and the through business over the

nly line of railroad between the Atlantic and Pacific must be immense,

VALUE AND SECURITY OF THE BONDS. The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now officed are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended; -on 20 miles of this road the curs are now running, and the tenaming 187 miles are nearly completed.

At the present rate of premium on gold these Bonds pay an annual interest on the present NINE PER CENT. nd it is believed that on the completion of the road, like the Government Bonds, they will go thove par. The Company intend to sell but a imited amount at the present low rate and retain

the right to advance the price at their option.

A CARD FROM THE AMERICAN WATCH COMPANY

WALTHAM, MASSL

TITIS Company beg leave to inform the public that they commenced operations in 1850, and their ctory now covers four acres of ground, and has ly Auction Prices, cheaper than before the over 700 operatives. They produce 75,000 Watches, a year, and make and sell not less than one half of all the Watches sold in the United States.

The difference between their manufacture and the European, is briefly this: European Watches are made almost entirely by hand, and the result is of necessity a lack of that uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful operative The largest Stock of Queens-ware and Glass- must vary. But it is a fact that, except Vatches of the higher grades, European Watches are the product of the cheapest labor in Switzerland, and the result is the worthless Ancres, Lepines and the so-called Patent Levers-which soon cost more in attempted repuirs, than their original price. Common workmen, boys and women, buy the rough separate parts of these watches from va-rious factories, polish and put them together, and take them to the nearest watch merchant who stamps them and engraves them with any

HOW AMERICAN WATCHES ARE MADE. The American Waltham Watch is made by no such uncertain process—and by no such incompetent workmen. All the Company's operations, from the reception of the raw materials to the completion of the Watch, are carried on unde one roof, and under one skillful and competent direction. But the great distinguishing feature of their Watches, is the fact that their wern parts are all made by the fluest, the most perfect and delicate machinery ever brought to the aid of human industry. Every one of the most than a hundred parts of every watch is made by a ma-chine—that infallibly reproduces every succeeding part with the most unvarying accuracy. It was only necessary to make one perfect watch of any particular style and then adjust the hundred no chines necessary to reproduce every part of that watch, and it follows that every succeeding watch must be like it.

The Company respectfully submit their watche on their merits only. They claim to make A BEATER ARTICLE FOR THE MONEY by their improved mechanical processes than can be made under the old-fashioned handieraft ava tem. They manufacture watches of every gra from a good, low priced, and substantial article in eliver hunting-case, to the finest chronometer and also ladies' watches in plain gold or the finest enameled and jeweled cases; but the indispensa-ble requisite of all their watches is that they shall be GOOD TIMEKEEPERS. It should be remem-bered that, except their single lowest grade named "Home Watch Company, Boston," ALL WATCHES made by them ARE KULLY WARRANTED

by a special certificate, and this warrantee is good at all times against the Company or its agents. BORRINS & APPLETON. July 22, 1867. 3m

ESTEY'S CELEBRATED COTTAGE, HARMONIC AND BOUDOIR ORGANS AND MELODEONS. ORGANS AND MELODEONS.

These Instruments stand unrivalled by any thing found in this country or in Europe, as is admitted by all impartial judges. The most eminent Pipe Organ Builders and Performers, the last to discover excellence in reed Tone, pronounced them vastly superior to all others for exceedingly quick articulation and round Tone, the essential feature in instruments of this class. We invite the severe scrutiny and criticism of all.

PATENT VOX HUMANA TREMOLO. PATENT VOX HUMANA TREMOLO.
This late and most wonderful invention (so acknowledged by all leading artists) will be found only in the Estev Instruments. In aftempting to describe the effect of this stop, we are at less for language. Its beauties cannot be written, but must be heard to be appreciated. By this stop an ordinary performer can produce an effect which requires a life time of practice for an artist upon a violin. It entirely changes the reed Tone, giving the sympathetic sweetness of the human volce, making it so includious and pure that it mover fails to enchant the listener.

THE HARMONIC ORGAN

for Churches, Public Halls and Parlors has a powerful sub-Bass with independent reeds, Har-monic attachment and Vox Humana Tremolo, and is believed to be the most powerful reed or-gan made, being nearly equal to a Pipe Organ of and is believed to be the most powerful read or, an made, being nearly equal to a Pipe Organ of three times the cost.

More than 18 years of regular use upon all descriptions of Crops grown in the Middle and Southern States, has given a litgh degree of popularity to this MANUE, which places its application now entirely beyond a mere experiment.

HAUGH'S HAW BONE SUPER-PHOSPHATE OF LIME is eminently a success as a Substitute for Peruvian Guano and Stable Manure—and is offered to the Agriculturists of the Northern and Eastern States as a fertilizer that will cheaply restore to the Soil, those essentials which have been drained from it by constant cropping and light manuring.

Tris very prompt in its action—is lasting in effect to a degree unattained by any commercial manure in the market, and is afforded at a much less cost than bought Stable Manure, or Peruvian Guano. The Labor involved in its use is far less than that of applying stable manure, while there is no risk from the introduction of noxious weeds. 35-Farners are recommended to purchase of the dealeg located in their neighborhood. In sections where no dealer is yet established the Phosphate may be procured directly from the undersigned. A Pricod Circular will be sent to all who apply.

Our NEW PAMPHLET, "How to Maintais the Fertility of American Furpa,"—50 pages, giving full information in regard to the use of manure, dec., will be furnished gratis on application.
